ROBERT SCOTT,	

FACULTY OF SCIENCE AND LETTERS.

REV. ISAAC FERRIS, D.D., LL.D.,
Chancellor, and Professor of Moral Philosophy and the Evidences of Revealed Religion.

ELIAS LOOMIS, A.M., LL.D.,
Professor of Mathematics, Natural Philosophy, and Astronomy.

JOHN W. DRAPER, M.D., LL.D.,
Professor of Chemistry and Natural History.

E. A. JOHNSON, A.M.,
Professor of the Latin Language and Literature.

HOWARD CROSBY, A.M.,
Professor of the Greek Language and Literature.

REV. BENJAMIN N. MARTIN, A.M.
Professor of Intellectual Philosophy, History, and Belles Lettres.

BENJAMIN F. BUTLER, LL.D.,
Professor of Law.

RICHARD H. BULL, A.M.,
Assistant Math. Prof. and Professor of Civil Engineering.

F. GIRAUD,
Professor of the French Language.

F. J. VINGUT,
Professor of the Spanish Language.

FELIX FORESTI,
Professor of the Italian Language.

_____,
Professor of the German Language.

S. F. B. MORSE, LL.D.,
Professor of the Literature of the Arts of Design.

THOMAS S. CUMMINGS,
Professor of the Arts of Design.

FACULTY OF MEDICINE.

REV. ISAAC FERRIS, D.D., LL.D.,

CHANCELLOR OF THE UNIVERSITY.

VALENTINE MOTT, M.D., LL.D.,

EMERITUS PROFESSOR OF SURGERY AND SURGICAL ANATOMY, AND EX-PRESIDENT OF
THE FACULTY.

MARTYN PAINE, M.D., LL.D.,

PROFESSOR OF MATERIA MEDICA AND THERAPEUTICS.

GUNNING S. BEDFORD, M.D.,

PROFESSOR OF OBSTETRICS, THE DISEASES OF WOMEN AND CHILDREN, AND CLINICAL
MIDWIFERY.

JOHN W. DRAPER, M.D., LL.D.,

PROFESSOR OF CHEMISTRY AND PHYSIOLOGY.

ALFRED C. POST, M.D.,

PROFESSOR OF THE PRINCIPLES AND OPERATIONS OF SURGERY, WITH SURGICAL AND
PATHOLOGICAL ANATOMY.

WM. H. VAN BUREN, M.D.,

PROFESSOR OF GENERAL AND DESCRIPTIVE ANATOMY.

JOHN T. METCALFE, M.D.,

PROFESSOR OF THE INSTITUTES AND PRACTICE OF MEDICINE.

CHARLES E. ISAACS, M.D.,

Demonstrator of Anatomy.

GEORGE A. PETERS, M.D.,

Prosector to the Professor of Surgery.

ALEXANDER B. MOTT, M.D.,

Prosector to the Emeritus Professor of Surgery.

JOHN W. DRAPER, M.D., LL.D.,

PRESIDENT OF THE FACULTY.

ANNUAL ANNOUNCEMENT.

IN issuing their Annual Announcement for the Session 1855-6, the Medical Faculty of the University of New-York feel that they have substantial reason to congratulate the Alumni, and the friends of the Institution generally, on the continued prosperity of their school. The session which is just closing numbers a class of 307, as will be seen by the accompanying Catalogue; and if it be recollected that the severe pressure of the times has displayed itself sensibly in the general diminution of the medical classes throughout the country, the public can not fail to perceive, in its present list of pupils, unmistakable evidence of the onward and healthy progress of the University. Of the 307 composing the present class, the State of New-York sends 112; New-Jersey, 23; New-Brunswick, 3; Virginia, 8; Pennsylvania, 14; Georgia, 39; Connecticut, 8; South-Carolina, 4; Alabama, 9; North-Carolina, 6; Kentucky, 7; Canada, 14; Tennessee, 7; Indiana, 4; Maryland, 5; Delaware, 1; Maine, 5; Florida, 2; Massachusetts, 5; Ohio, 8; Vermont, 5; Nova Scotia, 3; New-Hampshire, 3; Illinois, 2; Mississippi, 4; California, 2; Michigan, 1; Texas, 1; Iowa, 1; West-Indies, 1; Mexico, 1. It will thus be seen that the University of New-York is not a local institution, depending for support upon local influences, but it looks beyond home for its classes, and derives its pupils not only from every portion of the United States, but from various foreign countries.

The Faculty pledge themselves, by untiring effort, to make available for the purposes of medical education the vast resources of the American metropolis, which is now the third city in the Christian world; and it is not difficult to predict that it must soon become the first; and here, therefore, must be the place for the great medical school of the western hemisphere, if not of the globe. The Faculty of the University intend that theirs shall become that school. New-York City, with its suburban population, numbers nearly one million of souls, and the intelligent student will at once perceive how directly tributary such a population must necessarily be to the wants of medical science.

The following pages will disclose to the reader the actual facilities which the University presents to the student of medicine :

COURSE OF INSTRUCTION.

The courses of lectures given will be on anatomy—general, descriptive, surgical, and pathological ; principles and operations of surgery ; materia medica and therapeutics ; institutes and practice of medicine ; obstetrics, the diseases of women and children, with clinical midwifery ; chemistry and physiology ; clinical surgery ; clinical medicine ; clinical lectures on the diseases of the genito urinary organs ; clinical lectures on the diseases of women and children ; clinical lectures on physical diagnosis.

CLINICAL INSTRUCTION.

The system of instruction pursued in the University, is based on an anxious desire to teach the various departments of medicine, surgery, and obstetrics *practically* ; and it is the wish of the Faculty to communicate to their pupils knowledge which they can at once make available when they enter on the mission of practical duty. *Clinical instruction*, therefore, constitutes a prominent feature in their plan of education ; and the unlimited resources of New-York, with her immense population, her hospitals, infirmaries, dispensaries, public and private charities without number, enable the Faculty effectually to carry out the object which, to the practitioner, whether in surgery, medicine, or obstetrics, is the legitimate end of medical study, namely, *familiarity with disease at the bed-side*.

The attention of the reader is now requested to an enumeration of the advantages enjoyed by the students of the University for the *practical* study of surgery, medicine, the diseases of women and children, and the various specialities of the profession :

1st. *An Obstetric Clinique for the Diseases of Women and Children*, on every Monday, from 2½ o'clock to 4½ P.M., by Prof. BEDFORD. This clinique was first established by Prof. BEDFORD in October, 1850, and it has met with constantly increasing success. From the period of its first organization to the present date, there have actually been presented to the classes of the University between eight and nine thousand cases of the most interesting diseases of women and children.

In order that the reader may appreciate the facilities offered by this clinique, the following are among the cases introduced to the class during the session just closing :

Organic diseases of the uterus, 179 ; functional diseases of the uterus, 396 ;

polypus uteri, 5; ovarian disease, 19; prolapsus uteri, 11; procidentia uteri, 5; retro-versio uteri, 6; ante-versio, 2; procidentia vesicæ, 2; vesico-vaginal fistulæ, 6; recto-vaginal fistulæ, 2; ulcerative carcinoma, 7; vascular tumor of the meatus urinarius, 2; atresia vaginæ, 1; ulceration of cervix, 23; cauliflower excrescence, 1; sub-mucous fibrous tumor of the uterus, 2; venereal disease, 13; concealed pregnancy, 3; physometra, 2; imperforate os tincæ, 3; vaginal ovariectomy, 2; ascites, 5; dysmenorrhœa, 16; ammenorrhœa, 25; menorrhagia, 13; chlorosis, 9; abscess of the vulva, 3; stricture of the cervix uteri, 2; prolapsus of the ovary between the uterus and rectum, 3; etc., etc., with almost every variety of infantile disease. When it is stated that each of the above cases was presented to the class, and fully examined, together with the necessary discussion of its causes, symptoms, diagnosis, and treatment, the value of such facilities may be estimated.

2d. *Surgical Clinique* every Tuesday, from 2½ to 4½ o'clock P.M., by Prof. MORT. The following are among the operations performed at this clinique to the middle of January of the session now in progress: Ligature of right carotid for aneurism by anastomosis of face—child 6 mos. old; ligature of left carotid for fungus hæmatodes of eye-ball—girl 7 years old; ligature of both carotids for malignant disease in neck and eye—girl 15 years old; 2 extirpations of eye for malignant disease; scirrous tumors of female mammæ; lipomas; 3 cases of fistula in ano; glandular tumors of neck excised; burns and scalds; gun-shot wound in axilla; 2 cases spina bifida; 12 cases of nævus; 3 cases of fracture of fore-arm; 1 case of fracture of head of femur; 1 case of fracture of nose; 3 cases of fracture of leg; 2 cases of fracture of ribs; 4 cases of dislocation of shoulder; 1 case of fracture of cranium, with depression; 3 cases of cancer of the tongue; 7 cases of cancer of lip operated on; 3 cases of polypus of nose; removal of upper-jaw for disease of antrum; several cases of hernia; 4 cases of fissure of anus; 6 cases of hemorrhoids; 10 cases of hydrocele; 2 cases of cirsocele; 9 cases of club-feet; 6 cases of amputation of finger; 2 cases of fistula lachrymalis; 2 cases of ectropion; 20 cases of ulceration of cornea; cases of granulated lids; 5 cases of operations for strabismus; 10 cases of abdominal tumors; 30 cases varicose ulcers of leg; 20 cases of paronychia.

3d. *Medical Clinique* every Wednesday, from 2½ to 3½ o'clock P.M., by Prof. METCALFE. This clinique is full of interest from the great number of cases of miscellaneous disease presenting itself. During the present winter session, several hundred cases of consumption, heart-disease, aneurism, pleurisy, etc., have been examined by the students. The Clinical Class is divided into sections, each of which examines at leisure, in a room provided for the purpose, the lungs, heart, etc., of patients in whose cases a written record of physical signs has been previously dictated before the class by the Professor, and serves as a guide during the examination.

4th. *Surgical Clinique, with the Diseases of the Genito-Urinary Organs*, every Wednesday, from 3½ to 4½ o'clock P.M., by Prof. VAN BUREN. This clinique will, independent of its general surgical practice, afford ample opportunities to study that interesting class of diseases appertaining to the genito-urinary organs. Cases of syphilis, exhibiting every variety of that interesting disease—of gonorrhœa, gleet, stricture of urethra, fistula in perinæo, incontinence of urine, spermatorrhœa, impotence, hydrocele, varicocele, and various diseases of the testicle and of the rectum have been exhibited to the class.

5th. *Surgical Clinique* every Saturday, from 11 A.M. to 1 o'clock P.M. by Prof. POST. During the session, Prof. Post's Surgical Clinique has been very fully attended, and has presented great variety and interest. Among the important operations performed are the following: Lithotrity, 15 times; lithotomy, once; partial excision of upper-jaw for canceroid disease; also, a number of cases of hare-lip; fistula in ano; hydrocele; cirsocele; hemorrhoids; nasal polypi; strabismus; artificial pupil; cataract; club-foot; scirrous tumors of female breast; blepharoplastic operations; lipomas; glandular tumors of neck removed; fractures; dislocations; cancer of lip; minor amputations, etc. This clinique is particularly rich in diseases of the eye and ear.

The above cliniques are all held in the College-Building, free of charge to the students of the University, and present a vast amount of disease, of endless variety and interest. In the College-Building there are clinical wards for those patients, on whom capital or important operations are performed; and, not to speak of numerous other interesting operations during the session just closing, it will be seen that Prof. Post has performed before the class *Lithotrity* 15 times, and *Lithotomy* once, with complete success.

HOSPITALS, INFIRMARIES, DISPENSARIES.

1st. THE NEW-YORK CITY HOSPITAL, of which Professors MOTT and POST are Consulting Surgeons, Professor VAN BUREN an Attending Surgeon, and Professor METCALFE an Attending Physician, is one of the most extensive charities in this country. It is situated in Broadway, and is open daily, throughout the year, (Sundays excepted,) to the students at 1 o'clock P.M., in winter, and 12 o'clock M., in summer, when they are permitted to witness all the surgical operations, and to see the medical practice under the direction of the surgeons and physicians in attendance. The Library, which is annually increased, consists of *five thousand* volumes of the most valuable works on medicine, surgery, and the collateral sciences. The Hospital Museum consists of the most interesting specimens obtained from the *post*.

mortem examinations made in the Institution, and to which examinations the students are admitted. Clinical instruction is given daily by the attending physicians and surgeons. The lectures at the University are so arranged as to allow sufficient time for daily attendance at the Hospital. The cost of the hospital ticket for one year is eight, and for the winter five dollars, which will entitle the pupil to attend all the lectures, visit the wards daily, to use the library, visit the museum, etc. The number of patients treated in this Institution during the past year was 3400.

2d. BELLEVUE HOSPITAL. This is an extensive and valuable charity. It is open to students, free of cost, and presents extraordinary facilities for the study of disease. The number of patients admitted during the past year was little short of 6000.

3d. EYE AND EAR INFIRMARY. This invaluable Institution is also open to students, free of cost, and presents ample opportunity for showing these important and interesting specialities.

4th. DISPENSARIES OF THE CITY. These charities, which open to the student a wide field for practical observation, are also without charge. Some idea may be formed of the value of these Dispensaries to medical science, when it is stated that every year more than 80,000 patients, with every variety of medical and surgical disease, are treated by the physicians and surgeons in attendance. In these Institutions, the diseases are arranged into distinct classes, such as diseases of *the head, chest, abdomen, extremities*; fevers, eruptive disease, etc. Auscultation, percussion, etc., may be practised in the most satisfactory manner, and to any extent.

PRACTICAL ANATOMY.

An event of no ordinary importance to medical education has recently taken place in the State of New-York. It is the legalization of dissection by the Legislature; and it is due to truth, that his Colleagues should thus publicly express their thanks to Professor PAINE, through whose personal and untiring efforts, the passage of this important law was finally accomplished. It must be regarded as a most valuable contribution to science; and the Faculty feel that they have a special right to rejoice in this event; for the movement originated with the University, and the passage of the law was effected through the personal efforts of one of their colleagues. But the Faculty do not intend that the act legalizing anatomical pursuits shall merely remain a monument of the triumph of the intelligence of our times over ignorance and prejudice, or a recognition of the removal of those unjust liabilities under which physicians have hitherto labored, and have therefore used their utmost endeavor to secure *material for the students of the Univer-*

sity free of charge, and in the greatest abundance, in which they have succeeded beyond their anticipations.

The session during which the dissecting-room will be open for students, will occupy about five months, commencing in October, and terminating on the first day of March following. During the month of October the room will be open from 8 o'clock A.M. till 5 o'clock P.M.; and it will be the duty of the Demonstrator to attend there regularly, during that month, from 10 o'clock A.M. till 1 o'clock P.M., and to devote himself assiduously to the instruction of the pupils in the art of dissecting, and in the acquisition of anatomical knowledge. During the months of November, December, January, and February, the dissecting-room will be open from 8 o'clock A.M. till 10 o'clock P.M.; and it will be the duty of the Demonstrator to be in attendance from half-past 2 o'clock till 4 o'clock, and from half-past 7 o'clock till 10 o'clock P.M., and to devote himself to the instruction of the dissecting students. The students, on the payment of the Demonstrator's fee, (five dollars,) will be entitled to all the privileges of the dissecting-room, and will likewise be furnished with subjects, soap, and towels for washing. No extra charges will be made them on any account whatever, except for the injection of subjects, and it shall always be optional with the students, to have them injected or not.

MUSEUM, APPARATUS, MUSEUM OF COMPARATIVE ANATOMY, ETC., ETC.

The Anatomical and Surgical Museum is rich in preparations of practical value. It contains the extensive collections of Professor MOTT, and also those of Professors BEDFORD and POST.

The Professor of Chemistry has procured, at a very great expense, a chemical and philosophical apparatus of the best description, adapted to the illustration of a complete course of general and medical chemistry. He is constantly adding to this collection, and is in possession of the requisites for thorough instruction in this interesting department.

The collection of instruments for the surgical chairs includes every thing that is valuable, embracing all the recent improvements.

The Professor of Materia Medica and Therapeutics, at a heavy cost and with no little sacrifice of time, has collected an herbarium of great value; it contains the choicest specimens, and will enable him to present to the student his course of instruction in the most attractive and practical manner. The collection in materia medica is also very complete. In addition, he possesses an extensive collection of valuable drawings, all made under his own immediate supervision. These elegant paintings are executed upon an enlarged scale, and are accompanied by other medical floras representing the plants of

their natural size. The Professor has also added to the collections his valuable cabinet of minerals.

The collection of preparations belonging to the Professor of Obstetrics, together with a complete apparatus for the illustration of every portion of his course, will enable him to be thorough in his demonstrations.

COLLEGE-BUILDING.

The College-Building is very commodious in all its arrangements. It is situated in Fourteenth street, between the Third avenue and Irving place, and was erected by the Faculty in 1850. It has a front of 60 feet, and extends back 122 feet. The cost of the ground and building was \$70,000, and in its construction every care was taken to adapt it to the purposes to which it is appropriated. There are three large lecture-halls, each capable of containing between five and six hundred persons, together with extensive apartments for museums, dissection, etc., etc.

Regulations for the Terms of Lectures, Etc.

REQUISITES FOR GRADUATION.

The Lectures will commence on Mouday, the 15th of October, and be continued until the first day of March following.

The Examinations for the Degree will commence about the first of March, and will be continued daily, until the candidates shall have been examined.

The following are the requisitions for the diploma:

1. The candidate must be 21 years of age.
2. He must have attended two courses of medical lectures; one of which must be delivered in the medical department of the University of New-York.
3. The candidate must have studied medicine for three years (the terms of attending lectures being included in these) under the direction of a respectable medical practitioner.

4. He must write a medical thesis, either in the English, Latin, or French language.

Two commencements take place annually in the University, at either of which candidates who have complied with the above requisitions may graduate.

The first takes place early in the month of March and the other about the end of June. The great body of the candidates will, no doubt, graduate at the spring commencement; but those who wish to postpone it will have the opportunity of examination in June.

FEES FOR THE WINTER COURSE.

Full Course of Lectures,	\$105
Matriculation Fee,	5
Fee for Instruction by the Demonstrator,	5
Graduation Fee is \$30.	

BENEFICIARY FOUNDATION.

For the purpose of assisting meritorious individuals, the Faculty will receive annually a limited number of beneficiaries, who will be required to pay \$20 each towards the expenses of the Institution, and the matriculation fee. The sons of physicians and clergymen, other things being equal, will be considered as having a preferred claim. Those who are desirous of availing themselves of this foundation will present to the President of the Faculty, during the summer, satisfactory documents showing them to be persons of good moral character, and of appropriate elementary education, and in circumstances which require this assistance.

SPRING, SUMMER, AND AUTUMN COURSE OF LECTURES.

The Faculty, with a view of increasing the facilities for medical education, without increasing its expense, instituted in 1852 a spring, summer, and autumn course of lectures, which will commence the present year on the 19th day of March, and be continued to the 15th day of October, when the usual winter lectures will be resumed.

The opportunities which are thus offered to the medical student in this vast metropolis are not surpassed by those of Paris. What is there seen may be found here, and in abundance. The season is also more favorable than the winter for hospital and dispensary purposes, and the student's time is less occupied by lectures, or may be given at his own pleasure to those practical objects, since this course is not required for the degree in medicine.

TERMS OF ATTENDANCE.

There has been a very laudable desire in the Profession to extend the term of instruction at the medical colleges, in which the Faculty of the University has heartily sympathized; but it has been found impracticable, to any large extent, as a requirement from medical students. There are many, however, whose means are sufficiently ample to defray the expense of a long residence in this city, if not subjected to the additional payment of fees for instruction; and although the spring, summer, and autumn course be not required, its advantages are too evident for any farther explanation.

Students who shall have attended the winter course of lectures will be admitted to the spring, summer, and autumn course, *free of charge*. Those who have not attended the winter session will be admitted on payment of the matriculation fee and \$25; and should they decide on becoming pupils of the University for the winter course ensuing, the \$30 thus paid will be credited to them on taking out their tickets for that

course. The student will, therefore, gain in this manner seven months' instruction, free of cost.

Graduates who may have attended the optional course will have conferred on them a certificate of honor, as an evidence of their having pursued a fuller course of medical instruction than that usually followed by students.

BOARDING.

Good board can be obtained in the vicinity of the College from \$3 to \$4 per week.

N. B.—Students on arriving in the city will call at the College, No. 107 *East-Fourteenth street*, between Irving place and Third avenue, and inquire for the Janitor, Mr. POLMAN, who will provide them with boarding-houses.

Letters may be addressed to Professor DRAPER, President of the Faculty, University, New-York.

NEW-YORK, February 20, 1855.

A LETTER.

[THE following LETTER has been sent to the NASHVILLE JOURNAL OF MEDICINE AND SURGERY for publication.]

“UNIVERSITY OF NEW-YORK, January 22, 1855.

“*To the Editors of the Nashville Medical & Surgical Journal:*

“GENTLEMEN :

“The following statement occurs in the January number of the *Nashville Journal of Medicine and Surgery*, relative to the Medical Colleges in this city :

“‘The Medical Gazette (New-York) says the number of students in the College of Physicians and Surgeons is nearly equal to the class of last year, *and it still takes the lead in this city*, (New-York.) In the New-York Medical College the class exceeds that of last year by more than 50 per cent. IN THE UNIVERSITY SCHOOL (meaning the Medical Department of the University of New-York) THERE WOULD SEEM TO BE A FALLING OFF EVEN FROM THE MEAGER CLASS OF THE LAST, AND ANY FORMER YEAR.’

“The italics appear in your Journal ; the capitals are mine. The following are the facts :

“The College of Physicians and Surgeons has been in progress for nearly half a century, and its number of graduates last spring (1854) amounted to THIRTY-NINE. (*Vide* Nelson’s American Lancet & New-York Medical Times, April, 1854.)

“The New-York Medical College held its first Commencement in 1851, and its graduating class last spring (1854) amounted to TWENTY-FIVE. (New-York Medical Times, April, 1854.)

“The University Medical College held its first Commencement in 1842, and its number of graduates last spring (1854) amounted to ONE HUNDRED AND TWELVE.

$$39+25=64; 112-64=48.$$

“That you may feel better assured, perhaps, of the condition of the University College, I may state that, notwithstanding the great pecuniary embarrassments that are universally felt, the class of

the present session consists of *three hundred and seven*, as obtained by myself from the Matriculation-book, through the President of the Faculty. The members are also assembled from very extensive regions, as will appear from the following analysis. *Tennessee* supplies 7; *Georgia*, 39; *Delaware*, 1; *New-York*, 112; *New-Jersey*, 23; *Virginia*, 8; *Pennsylvania*, 14; *Connecticut*, 8; *Alabama*, 9; *Kentucky*, 7; *North-Carolina*, 6; *Iowa*, 1; *Texas*, 1; *Michigan*, 1; *Maryland*, 5; *Maine*, 5; *Mississippi*, 4; *South-Carolina*, 4; *Indiana*, 4; *Florida*, 2; *Massachusetts*, 5; *Ohio*, 8; *California*, 2; *Illinois*, 2; *Vermont*, 5; *New-Hampshire*, 3. *Foreign Countries*: *Canada*, 14; *New-Brunswick*, 3; *Nova Scotia*, 3; *West-Indies*, 1.

“But the prosperity of a Medical school is best ascertained by its numbers of Alumni, and you will permit me to state, in justice to the community as well as to the Institution with which I have been identified from its foundation, that, for the thirteen years of its existence, it has sent forth ONE THOUSAND THREE HUNDRED AND NINETY-SEVEN GRADUATES; averaging 107 for each year, exclusive, of course, of the few gentlemen upon whom the honorary degree has been conferred. This, therefore, is a prosperity which vastly exceeds that of any other medical college in the United States within its first thirteen years; and, as I have reason to believe, in any other part of the world, though Paris may possibly form an exception.

“I remain, gentlemen,

“Your colleague and obed. serv’t,

“MARTYN PAINE.

“W. K. BOWLING, M.D.,

“PAUL F. EVE, M.D.,

“*Professors of Medicine and Surgery in the University of Nashville, Tenn.*”
